FOR GENERAL FILE SETUP CONSULT THE FULL FILE PREP GUIDELINE AT:

For all XSnap skins we require **1.5" of bleed OVERALL (.75" on all sides)**. If bleed is not provided to us we will do our best to add/clone your artwork when applicable. If not, we will need to bleed out your image to ensure we have enough for print/finishing. See example below:

• X-Factor •

Due to the nature of the Xpressions® Salesmate™ graphics, we recommend keeping all artwork elements you do not want severely distorted (ie text, logos, or faces) 3-5" in on all sides, however due to the small size of the Salesmate™ skins this leaves little room for design. We find that **1.5" in** on all sides creates an acceptable amount of stretch while still allowing plenty of space for your design.

EXAMPLES OF STRETCH AT DIFFERENT SIZES SHOWN BELOW:

PLEASE NOTE IF DISTORTION IS INTENDED AS PART OF DESIGN
